

RK Bell Group

Specialists in the complete plant, civils and surfacing package

From our location in Bridgwater we undertake contracts in the South West – in the housing, water, retail, commercial, health, education, domestic and leisure industries.

Our extensive plant and machinery “Bio” fleet allows us to work on environmental sensitive projects throughout the region.

Our professional and dedicated management team will deliver a client’s project on time, safely and within budget.

Our staff are required at all times to comply with the highest Health and Safety Standards and environmental controls, endeavouring to give our clients complete satisfaction.

Any range of contract undertaken, whether all risk, plant and labour only or cost plus, and happy to be involved in the early stages of any project to assist with budgeting and construction problem solving.

Our areas of specialism include:

- Civil Engineering
- Surfacing
- Groundworks
- Plant Hire
- Retaining Walls
- Drainage and Services
- Off Site Disposal
- Paving and Hard Landscaping
- Landscaping
- Site Remediation

RK Bell Group

Comprehensive services – tailored to your needs

Civils Division

RK Bell Projects Civils Division offers a comprehensive range of groundwork and civil engineering services, specialising in the housing, commercial, retail, domestic and local authority sectors.

We are a company developing strong working relationships with an extensive range of clients, priding ourselves on providing a dependable, value for money service.

We are renowned for winning projects both on the basis of a cost efficient delivery, with a flexible and non-confrontational approach. This makes us your ideal project partner when integrating into your overall construction programme.

By working in partnership with our customers, we ensure they experience the highest levels of quality and work assurance.

Surfacing Division

RK Bell Projects Surfacing Division operates in all areas of the South West, Southern England, South Wales and parts of the Midlands.

We provide all aspects of Highway construction using Asphalt, Coloured Asphalt, Resin Bonded/Bound Gravels, Concrete and Block Paving. We also have craftsman experienced in the laying of natural stone setts and paving.

Our contracts range from housing developments, commercial, local authorities and industrial to small domestic works such as private driveways.

The Surfacing division's aim is to deliver a high quality service through professional, friendly management and production team. This team has many year's experience in the industry, is suitably qualified and has a proven record of quality.

Plant Hire

The RK Bell group have an extensive range of plant for hire, operated or non-operated, and running on Bio Oils.

A range of 360° excavators, from 1 ton mini to 35 ton tracked machines. Wheeled and long reach are also available. All machines come supplied with complete range of buckets, fitted with quick hitches, tracking devices and vandal guards.

Our JCB 3CX 180° wheeled backhoe excavators are extremely versatile. All come supplied with complete range of buckets, fitted with quick hitches and tracking devices

A wide range of attachments are available for our machines, which are piped ready to receive. These include rock breakers, grapples, pile hammers, wacker plates and specialised buckets.

Transport & Materials

RK Bell operates a fully licensed Transfer station producing recycled products following the Wrap protocol.

Some of the products we are able to supply are certified 6 F5, Type 7 fill material, as dug and BS3882 Top soils. We can accept in all types of inert waste and offer tipping facilities on site and have inert landfill solutions throughout the South West.

We have an extensive range of transport vehicles to include Low Loaders SGTO category 2, Plant Transporters, Tipper Lorries 6 and 8 wheeled these vehicles can be offered on a day work or on a load work bases.

We let our clients do the talking....

Environment Agency Wessex Water Balfour Beatty
Hanson May Gurney Summerfield Developments
Dean and Dyball Jackson Civil Engineering Dawnus
Birse Civils Atkins

RK Bell provided support in carrying out work on an Environment Agency Capital Works Project. They sourced and supplied over ten thousand tons of a type 7A clay and were able to use their local knowledge to ensure that the project was carried out to the safety and environmental standards set by the Environment Agency.

RK Bell played a significant part in the successful completion of this project and as a result I would not hesitate to recommend them for future work of this type.

May Gurney for the **Environment Agency**

We at Wessex Water hold RK Bell in very high regard. Their involvement projects has undoubtedly contributed to them being completed in a safe and environmentally friendly manner, as you can no doubt appreciate, the construction element of the water industry demands a high level of service from all of its suppliers and subcontractors these factors are to be found in abundance from RK Bell's machinery and staff.

I have found their level of service excellent, and nothing is too much trouble for them. When a problem arose it was dealt with quickly and efficiently.
